

# 5G, are you ready?

Company presentation - Ericsson

At Ericsson 5G technology is already reality. This new technology is going to affect everyone's life because it will set a new standard for our data exchanging.

5G will affect the most:

- The automotive sector, enabling autonomous drive and changing our paradigm in this industry
- Natural disaster prevention will be made easier allowing to prevent deaths just by put on the ground sensors tracked with an error of 10cm. with 4G this number was 100 times bigger.
- Smart home, the new IoT devices will have the right technological infrastructure to communicate with each other
- Gaming industry, allowing VR games to improve their current bugs caused by 4G

At Ericsson we learned that a new wave of technology is coming and it will have an impact on everyone's life. We saw that 5G could help a lot of people with very simple innovations and it could improve our quality of life.

5G, we cannot wait to see you!
